

Electricity Switching - September 2019

September sees six hundred thousand switch

Energy UK's latest electricity switching figures - published today - reveal that 603,400 customers moved to a new supplier last month - 10% up on September 2018.

This brings the total number of electricity switches to 4,741,454 so far in 2019, up 11% on the same time last year when a record 5.8 million customers switched supplier.

Lawrence Slade, chief executive at Energy UK said:

“Last month alone over 600,000 customers switched – and with over 4.7 million customers moving to a new supplier so far, 2019 is set to be another record year for switching. It is brilliant to see that every month more and more consumers reap the benefits of increased competition.

“Customers, whatever their circumstances, can benefit from checking their tariff so if you're concerned about your bill going into winter, pick up the phone to your supplier and see if you're on the best deal - or have a look at what other offers are available in the market.

“Just as importantly consumers can save more on their energy bills by getting a smart meter and making their house more energy efficient, which will also reduce their carbon footprint and help tackle climate change.”

Notes for editors:

- ▶ [To see the latest monthly switching stats, please visit Energy UK's website.](#)
- ▶ The rise in switching figures over last few years has been as follows:

- ▶ The switching data is now supplied by Gemserv (starting from September 2018). Gemserv Limited is the service company contracted by the MRA Service Company (MRASCo) to provide services in support of the MRA including the management of its governance and providing specialised expertise to MRASCo in support of the growing electricity retail market. Historical data up to August 2018 was provided by Electralink.
- ▶ The data referenced in these reports is for electricity only. These figures include both domestic & non-domestic customers but do not include customers transferred to another supplier as a result of the Supplier of Last Resort process (SOLR).
- ▶ For more information about the Guarantee: www.energyswitchguarantee.com
- ▶ These figures do not include internal electricity switching. Such statistics can be found on the [Ofgem website](#).
- ▶ Energy Switch Guarantee's research was conducted by Populus in the form of an online survey with 2,816 respondents living in Great Britain who are responsible for their household's energy supplier and it took place between 13th-17th March 2019. For more information click [here](#).

Change of Supply Event

A 'Change of Supply Event' is the industry term for describing when a domestic or non-domestic customer switches from one supplier to another. The total number of electricity switches in September was 603,400.

Total number of switches

Movement between supplier groups

In September 2019, of all switches:

- ▶ **34%** were from larger to small and mid-tier suppliers
- ▶ **16%** were from small and mid-tier to larger suppliers
- ▶ **23%** were between larger suppliers
- ▶ **27%** were between small and mid-tier suppliers

Movement between small and mid-tier and larger suppliers

Gains by small and mid-tier suppliers

In September the net gain* by small and mid-tier suppliers was 110,471 this is 18% of all switches.

*Net gain is the number of switches from larger to small and mid-tier suppliers minus the number of switches from small and mid-tier to larger suppliers.
